ABOUT ME

I'm software developer with a background in web development and experience building digital solutions for operational needs. Experienced in developing web-based applications, managing data, and implementing efficient system logic. In addition to web development, I have experience developing educational games using Unity and C#, which has strengthened my understanding of programming logic, code structure, and user experience.

EDUCATION

Indonesia Computer University (UNIKOM)
Bachelor Informatics Engineering
GPA: 2.79/4.00

Bandung, West Java, Indonesia
2020 - 2025

EXPERIENCE

Raccolta Aggriculture

Freelance Fullstack Web Developer
(<https://raccoltaaggriculture.my.id/>)

May – July 2025

- Built a company profile landing page using Tailwind CSS, and JavaScript for the front-end display based on the design.
- Developed a web-based product catalog system using PHP Native and MySQL.
- Set up hosting services so that the website can go live with fast and precise performance according to needs.

West Java Food Security and Livestock Service East Java

Freelance Fullstack Web Apps Developer

November – December 2023

- Build a web app to manage animal competition registration using HTML, CSS, JavaScript (AJAX), and PHP Native.
- Design and develop front-end and back-end systems to support user-friendly form input, validation, and data handling without requiring an internet connection.

Bank of Indonesia Bandung Branch
Team Manajemen Intern (Logistic)

August – October 2023

- Conducting data collection and verification of physical assets belonging to Bank Indonesia in the West Java region, ensuring the accuracy and up-to-dateness of asset recording using Microsoft Excel.
- Create a QR code-based access system to help senior staff retrieve asset data efficiently and reduce manual searches.
- Digitize asset-related documents and organize them systematically to facilitate retrieval and archiving.

PERSONAL PROJECT

Plant Defenders

Indie Game Developer

(<https://github.com/Abyan23/Plant-Defender>)

December 2024 – now

- Design and develop 2D Android educational games with Unity & C#.
- Building interactive gameplay mechanics (mini-games, story-based levels).
- Manage all aspects of development: UI/UX, asset creation, Android optimization.
- Educating user about plant pests with environmentally friendly solutions.

SKILLS

- Web Development – Tailwind CSS, JavaScript, PHP Native
